

Charlene Noye

Toronto, ON | P: +1 4379889042 | noyecharlene@gmail.com | <https://cecenoye.co> | [charlene-noye](https://charlene-noye.com)

EDUCATION

York University

Lassonde School of Engineering, B.Sc., Hons Computer Science

Relevant Coursework: Intro to Database Systems, Machine Learning, Data structures & Algorithms, Software Tools

Expected May 2025

Toronto/ON

WORK EXPERIENCE

CitiGroup

Software Development Intern

May 2024 – Aug 2024

Canada/Mississauga

- Enhanced an existing testing framework by adding support for QuickFIX using Python, enabling message sending over TCP/IP.
- Implemented and extended Kafka microservices in Java to include Drop Copy messages, improving message reliability and audit trails
- Developed solutions to send FIX messages across various venues, focusing on connectivity testing by establishing socket connections and validating responses.

JP Morgan Chase & CO

Software Engineer Apprentice

Oct 2020 – Jan 2021

United Kingdom/London

- Programmed and Optimized an interactive stock market data interface using **React.js** providing real-time visualizations for traders.
- Developed and integrated backend functionalities in **Python (Flask)** and **Java (Spring Boot)**, leading to a **50%** improvement in data processing speed and increasing scalability for stock market API interactions by **75%**..

PROJECTS

Music Originality and Inclusivity Platform | [Source code](#)

Mar 2024

- Developed a platform to safeguard music originality for marginalized artists using **Flask**, **Cohere**, and **Flow** blockchain
- Implemented a Dual-headed LSTM model with **PyTorch** for melody and lyric analysis to detect copyright infringement

Machine Learning Model for Credit Card Fraud Detection | [Source code](#)

Jan 2024

- Developed a cutting-edge credit card fraud detection system using **Python** and **Jupyter Notebook**.
- Leveraged advanced machine learning libraries, including **Scikit-learn**, to achieve **93%** accuracy on test data.

ACTIVITIES & LEADERSHIP

NSBE Hackathon Winner

Feb 2024

- Led the frontend aspect and coded in **Node.js** for my team at the NSBE hackathon, resulting in victories across multiple categories including Best Use of **FLOW**, Best BFN, and receiving an Honorable Mention from **Cohere**

Roborama Robotics Winner

Jan 2024

- Served as the lead programmer for the software team securing **3rd** place in the competition

Skills

Programming: Java, Python, JavaScript, HTML/CSS, SQL, C, C++

Developer Tools: Android Studio, Visual Studio, Git, Microsoft Office

Libraries/Frameworks: ReactJS, NodeJS, Jupyter Notebooks, QuickFix

Technologies/Platforms: GitLab, AWS, Kafka
